

TECNO INCOLLAGGI

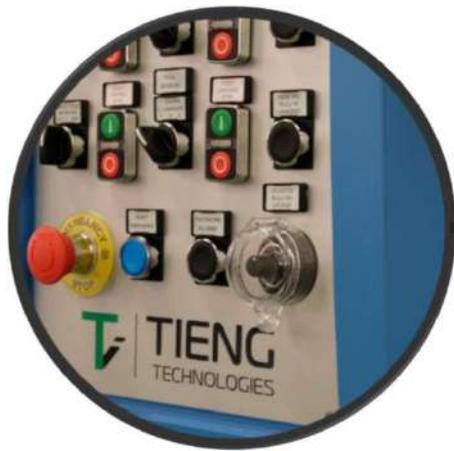

THE INDUSTRIAL GLUING DIVISION OF GRIFAL TECHNOLOGIES

Advanced Solutions, Stronger Bonds

Our story

Founded in 1993, it immediately stood out for the innovation and reliability of its machines, which are still operating around the world today. The acquisition by Grifal in 2021 allowed the company to rely on new expertise and capital, giving a strong boost to its growth.

OUR STRENGTHS

INNOVATIVE TECHNOLOGIES

ADVANCED ENGINEERING

CUSTOMIZED SOLUTIONS

TECHNICAL CONSULTANCY ON MATERIALS

Traditional Hot Melt Adhesive Machines

MAXIMA 10 NL

MAXIMA 50 NL

CONTROL PANEL

MAXIMA 250 NL

The **MAXIMA NL** Series Tank Melters are designed for the melting and dosing of any type of Hot Melt in granules or blocks:

- **EVA**
- **APAO**
- **PSA**
- **Rubber-Based**
- **Polyamides**

They ensure high thermal efficiency and low energy consumption thanks to the carefully designed geometry of the tanks.

Reactive Hot Melt Adhesive Machines

AZP 2 NL

AZP 20 NL HT

AZP 20 NL

AZP 200 NL

AZP 200 TWIN NL

The **AZP NL** Series Drum Melters are designed for the melting and extrusion of Hot Melt **from 2 – 20 – 200 Kg** drums, such as:

- **Reactive Polyurethane Hot Melt**
- **Reactive Polyolefin Hot Melt**
- **PSA**
- **Polyamides / Polyesters**
- **Butyls**

The **hydraulic plate lift system** ensures a high glue dispensing capacity with **limited heating energy consumption**.

Accessories for Traditional and Reactive Hot Melt Adhesives

To complement the melting units, we produce a series of accessories to optimize all bonding processes:

- Bead Injectors **AZM 23**
- 0 Cavity Bead Injectors **AZM 23 0C**
- Spyro / Spray Injectors **AZM 23 S**
- High-Flow Injectors **AZM 23 PU8**
- Fixed-Gap / Multiline Spreading Heads **TS**
- Variable-Gap Spreading Heads **RTS**

Two-Component Adhesive and Resin Machines

EASYMIX

TECNOMIX

TECNOMIX 220

INIETTORE GUNMIX

The new generation of **TECNOMIX dispensers** is designed to dose and mix two-component resins with low, medium, or high viscosity, such as:

- **Polyurethane Resins**
- **Epoxy Resins**
- **Silicones**
- **Others...**

Roller coater

HRS 1700 B EVO

The **WRS - HRS series roller applicators** have been developed to dose **Warm Melt** resins, as well as traditional and reactive (**PUR**) **Hot Melts**, for a wide range of applications..

Casein glue transfer system for labelling

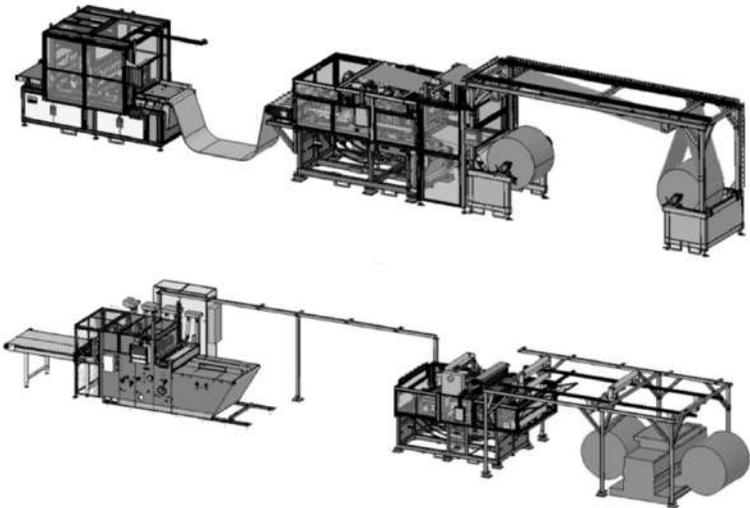

Production and processing

For the packaging market, we design, manufacture, and install:

- Bench-top **cutting machines**
- **Technical consultancy** on glues and adhesives
- Predictive **maintenance** and support
- Management and planning **software** development
- Connections and consultancy for **Industry 5.0**

Production and processing

For the packaging market, we design, manufacture, and install:

- **cArtù®** production and **processing lines**
- Modular stand-alone **cutting machines**
- Bench-top **cutting machines**

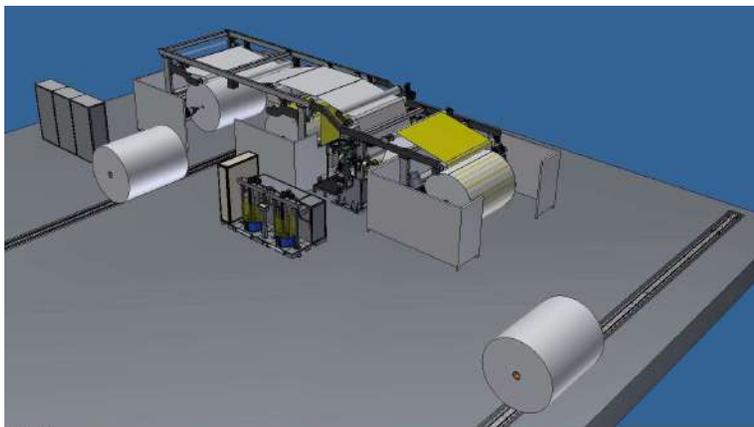

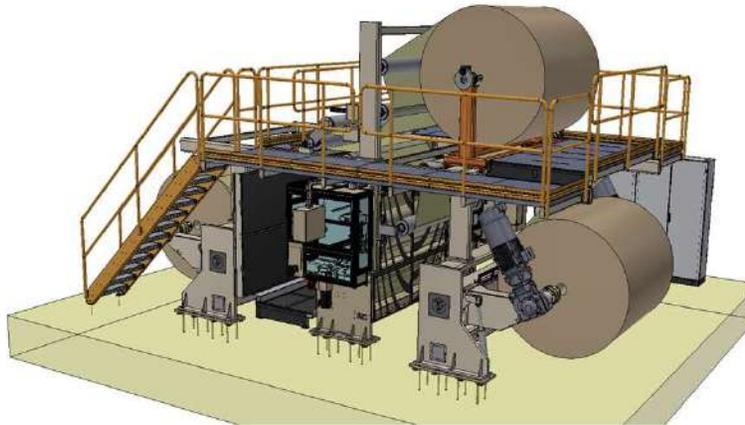

Production and processing – Plotter

- Economical **Plotters** with self-learning function
- **Plotters** with automatic management via **Cad-Cam**
- Automatic **Plotters** with **integrated vision system** and image recognition

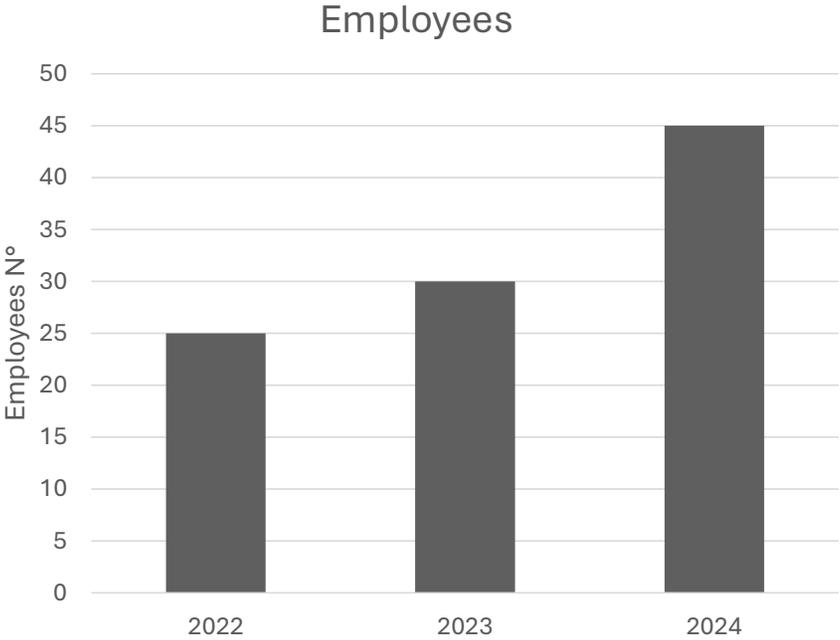

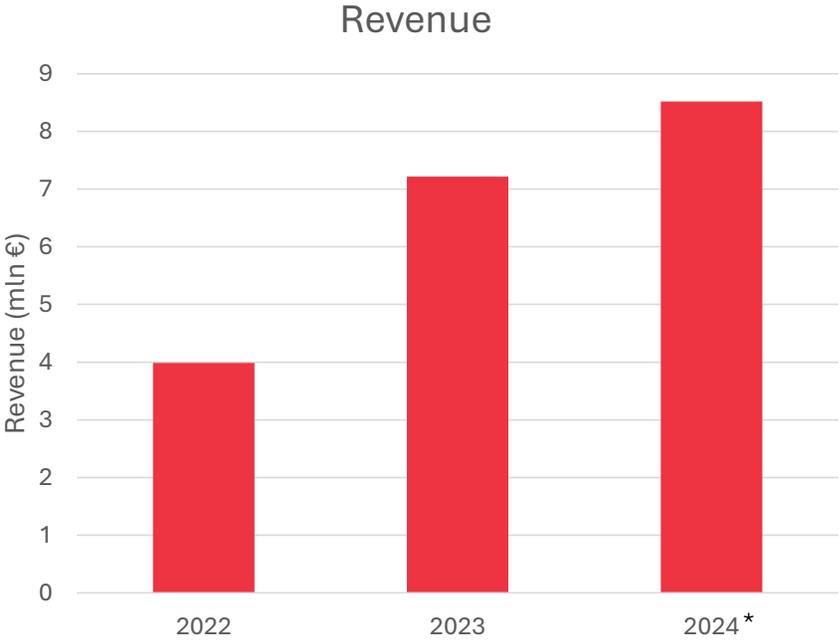

Lamination Line

Stronger and stronger

Since 2021, the company has steadily grown in both revenue and employees

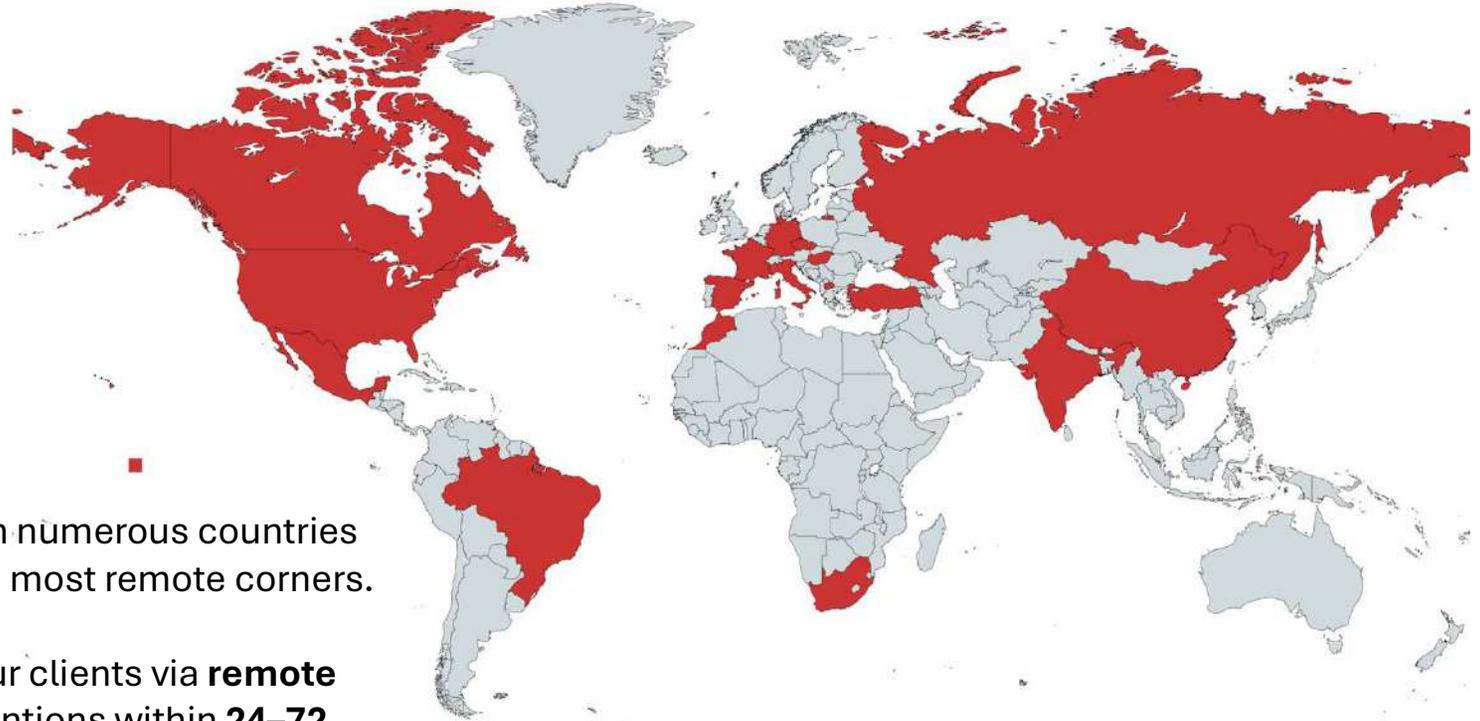

*Preliminary figures may be subject to change upon approval of the financial statements as of December 31, 2024.

Some of our clients

International presence

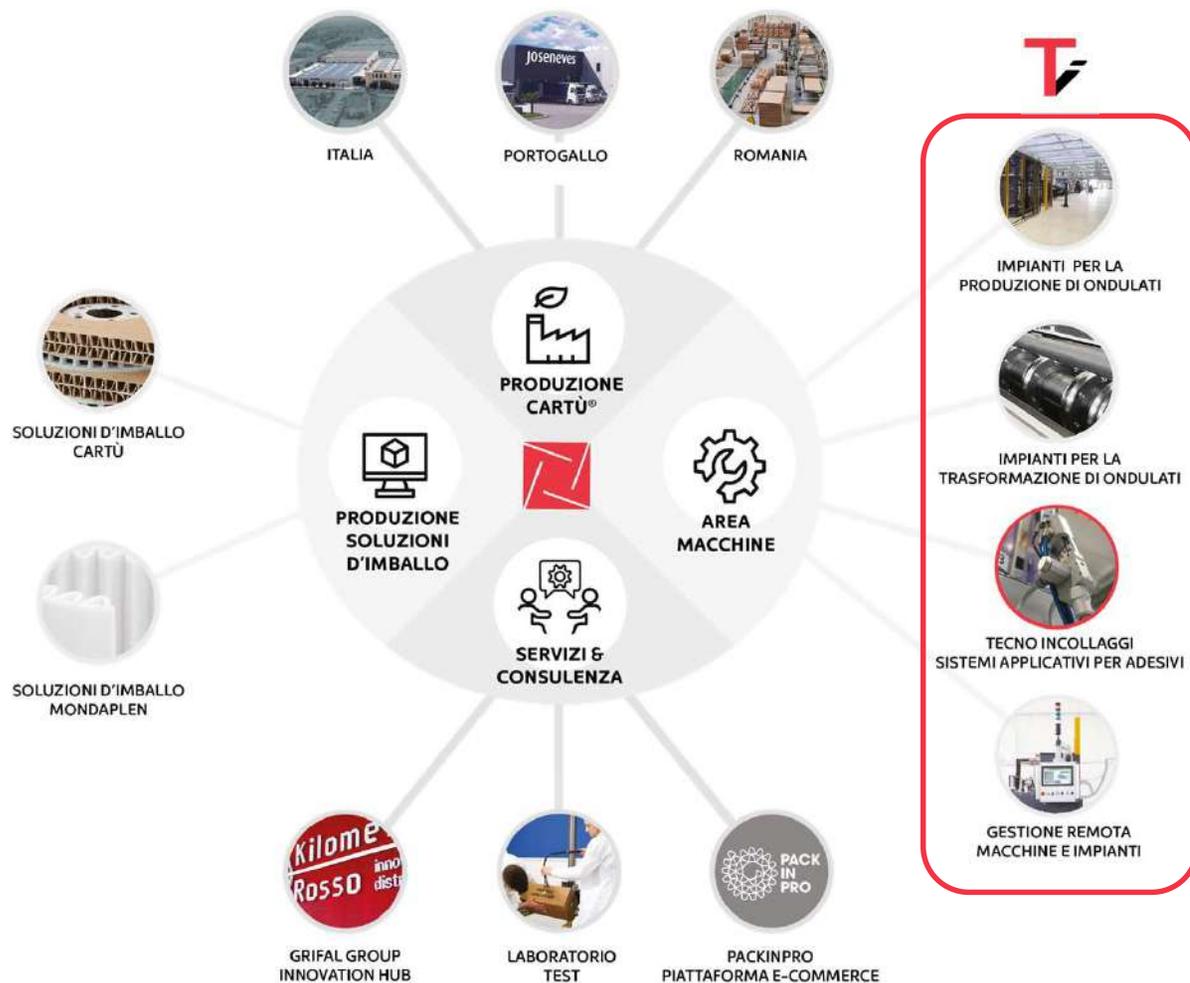

Our machines are installed in numerous countries around the world, even in the most remote corners.

We provide fast support to our clients via **remote assistance** or on-site interventions within **24–72 hours** of the request.

Spare parts are always available in stock and ready to be shipped.

Grifal Ecosystem: 360° innovation

GRIFAL GROUP
IMAGINE · DISCOVER · CREATE

EMPLOYEES: 196

RAVENEU: 37,7 mln €*
(al 31/12/2024)

Tecno Incollaggi is the Grifal Group company dedicated to designing and manufacturing innovative machinery for the bonding sector, as well as for the production and processing of packaging materials.

*Preliminary figures may be subject to change upon approval of the financial statements as of December 31, 2024.
